

TIME TO RECYCLE YOUR CONCRETE

Due to increase in projects and jobsites, ecology has been affected directly, and it became a concern of batching plants, too. ELKON comes up with the perfect solution to one of the biggest problems; concrete residuals, with designing

ELKON CONCRETE RECYCLING SYSTEMS

Protect Your Environment & Save Your Cost...

This special system separates concrete into solid components and water and allows them to be reused. And this waste water can be used in mixers, pumps and loading mechanisms, it can be used.

ELKON RECYCLE is effective both in protecting environment and recycling residual materials.

SPECIFICATIONS OF ELKON RECYCLE-10

Capacity : 10 m³/h

Max aggregate dimensions: 50 mm

Total Install Power: 20 kw

Operating Voltage and Frequency : 380 V/50 Hz

Control Voltage: 24 V
