Transportation	2 Units in 1 TIR	2 Units in 1 TIR	2 Units in 1 TIR	2 Units in 1 TIR	1 Unit in 1 TIR	1 Unit in 2 TIR	-

* Figure referred to cement with bulk density 1,4 tons/m³

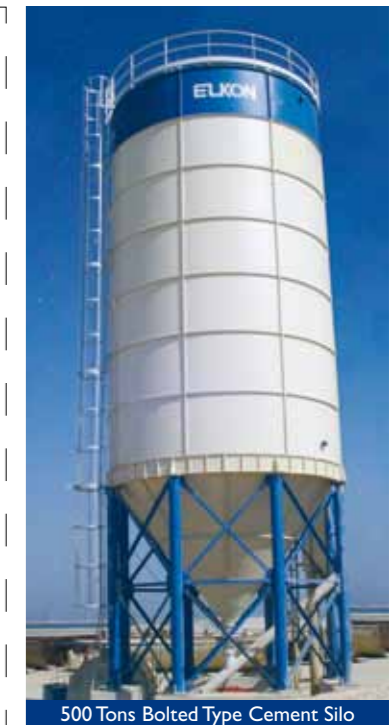

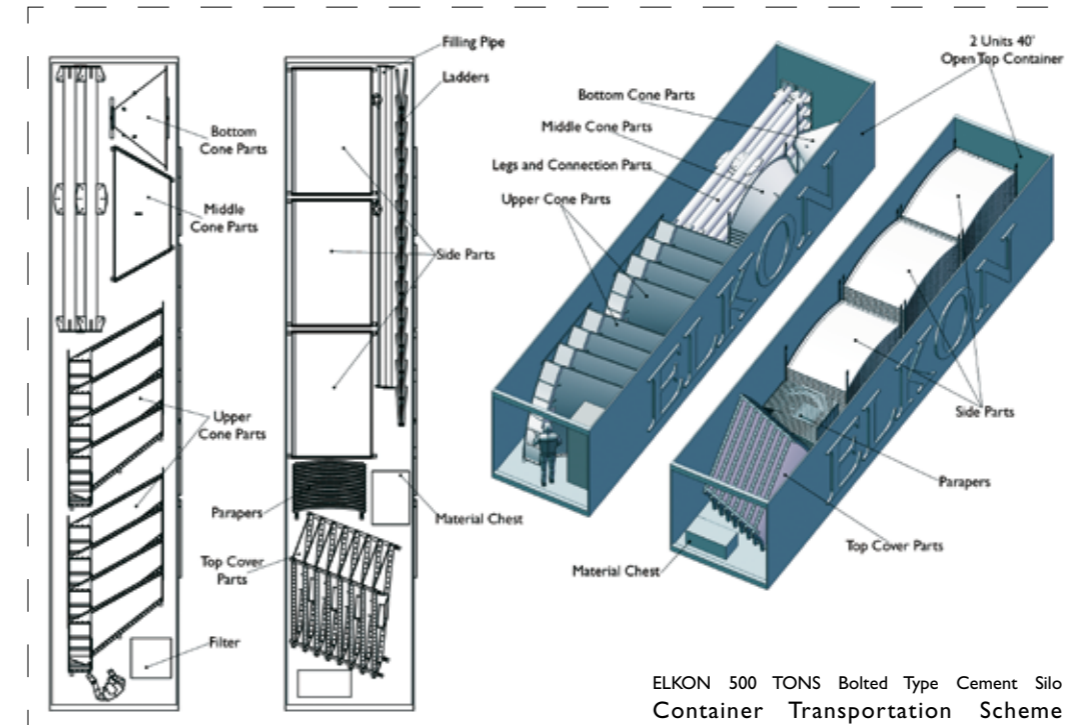

ELKON established a new separate factory for manufacturing of cement silos in 2007 and with this investment ELKON gained high capacity in manufacturing of cement silos. Bolted type cement silos which are manufactured in different capacities, provide great advantages especially in transportation. For example, **2 units 150 tons bolted type cement silos can be transported by only 1 TIR.**

CEMENT SILO EQUIPMENTS

The parts of the cement silos are manufactured by special laser cutting and drilling technologies and they are implemented special surface cleaning procedure. The parts of the cement silos also are manufactured in sensitive production facilities with special equipments and they are painted with prime coating and final coating. The parts which are hung on automatic conveyor line, are painted in special painting cabinets. Then the parts of the cement silos are packed specially suitable for transportation.
